

VERIFICATION POLICY

As CAC CONFORMITY ASSESSMENT CENTER D.O.O;

In our verification service activities;

As a result of economic changes arising from global changes such as climate change, we provide training and verification services on greenhouse gas at the international level that will create a common future for our customers and related parties with our expert, professional staff in order to provide an accurate and effective verification service to organizations that change their strategies, policies and preferences or want to take part in this process.

For this purpose, we provide verification services in an impartial, independent and fair manner, taking into account the needs of all interested parties, away from any kind of interest relations.

It regularly improves the verification management system by evaluating conflicts of interest and potential risks to ensure impartiality and objectivity in our activities.

In addition, in order to achieve this goal, measurable targets are regularly reviewed by the senior management and the level of achievement of the set targets is monitored.

While carrying out our activities, we attach importance to customer rights and confidentiality in accordance with the agreements we have made with our customers; we provide a service that is open to responding to expectations, requests and complaints in a timely manner and every time.

In order to improve the quality of our verification management system, we continuously monitor our internal and external activities and evaluate customer feedback.

By employing national and international experienced personnel in our verification activities, we adopt the principle of continuous development with the trainings that our existing personnel and verification staff will need; It ensures that all our staff provide a fair service by complying with the rules of impartiality and confidentiality during their activities, depending on the principle of responsibility.
